Brainstorm & idea prioritization

Consider the environmental impact of the solutions and explore ways to make them more sustainable.

Brainstorm marketing strategies to reach the target audience effectively. This may include digital marketing, partnerships, or other promotional activities.

Establish a feedback loop to continuously gather input from users and make improvements to the solutions.

Create a timeline with milestones for the development and launch of these solutions. This help in tracking progress.

development, marketing, and ongoing operations. Identify the necessary resources and funding sources.
